

## What you can expect from a Terraclean service...

### A Terraclean service will:-

- Restore fuel economy
- Regain vehicle performance
- Smooth idle by increasing lambda efficiency
- Save on costly repairs by prolonging component life
- Give immediate drive-away difference

### Did you know?

Only Terraclean will restore your vehicle's performance and fuel economy by removing carbon deposits from your oxygen sensors and other engine components.

### Don't just take our word for it!

Terraclean is OEM approved by a leading vehicle manufacturer for use on their vehicles and is recommended by TV's Edd China.

“ Terraclean Service works to maintain your vehicle, helps us take care of our environment and saves £££'s off your fuel bills ”

- Edd China

Restore MPG    Reduce Emissions    Regain Performance

# Terraclean is the only de-carbonising service of its kind in the world!

## What is Carbon Build-up?

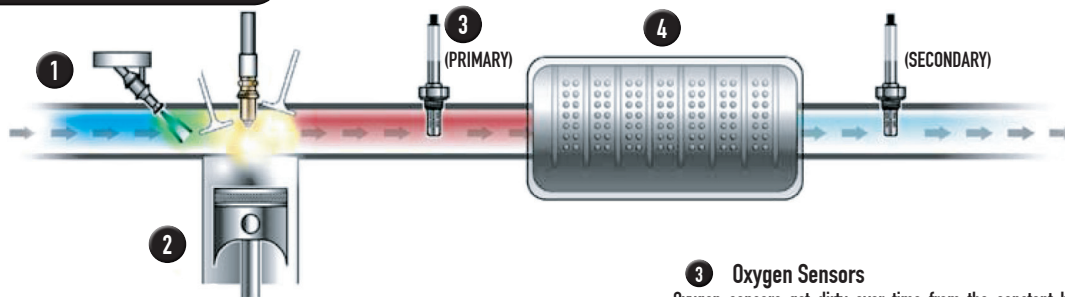

Carbon deposits are the by-product of combustion inside your engine. This build up will affect the efficiency of your engine and typically result in reduced performance, reduced fuel economy and increased emissions.

## Keep Your Car Properly Decarbonised!

Proper vehicle maintenance should never be overlooked. Keeping your engine properly decarbonised can improve fuel economy by 4 - 15%, however fixing a faulty oxygen sensor can improve your fuel economy by as much as 40%!

### Your Vehicle

#### 1 Fuel Injector

Terraclean will remove the varnish and carbon build-up on the fuel injector tips and restore the spray pattern. It has been shown that a varnish layer as fine as 5 microns within the pintle head can restrict fuel flow through the injector by as much as 25%.

#### 2 Combustion Chamber

Terraclean also removes carbon from within the engine's combustion chamber and on the intake valves, reducing octane requirement and improving idle and drivability.

#### 3 Oxygen Sensors

Oxygen sensors get dirty over time from the constant bombardment of carbon, soot and chemicals, which shortens their life. When this happens they can send improper or delayed information to the car's ECU, which alters the engine's fuel mixture, causing poor fuel economy, poor performance and excess pollution. Terraclean has been proven to clean and extend the life of your oxygen sensors, thereby restoring fuel economy and performance.

#### 4 Catalytic Converter

Terraclean has been proven to extend the life of the catalytic converter by removing the carbon deposits from inside.

Restore MPG ● Reduce Emissions ● Regain Performance
